

Jianshen Liu

STAFF ENGINEER · DISTRIBUTED SYSTEMS & AI INFRASTRUCTURE EXPERT

Markham, ON L3R 6L5, Canada

☎ +1 (437) 340-4427 | ✉ ljishen@gmail.com | 🏠 www.jianshenliu.com | 📷 ljishen | 🌐 jianshenliu

Summary

Staff engineer with 15+ years of experience building AI data and storage systems for large-scale inference workloads. At Huawei Technologies Canada, improved vLLM inference performance by 80% and delivered an xPU data-direct accelerator reaching 2.9 GB/s, about 25% faster than Nvidia BaM. Deep expertise in **C++**, **CUDA**, **Linux kernel**, **DPDK**, **SPDK**, **Apache Arrow**, and distributed storage performance engineering. Ph.D.-level research background with 6 peer-reviewed publications on SmartNICs, computational storage, and embedded data services.

Skills

DevOps	AWS, GCP, Docker, Kubernetes, Jupyter, Jenkins, Git, CI/CD, Vagrant, Bazel, Maven
Systems	Linux Kernel, eBPF, SPDK, DPDK, Ceph, Apache Arrow, NVMe, Microservices, Distributed Systems, RocksDB
Programming	C++, CUDA, Python, Java, Bash, SQL, PHP, JavaScript, LaTeX
Languages	English, Cantonese, Mandarin

Work Experience

Huawei Technologies Canada Co., Ltd.

Markham, Canada

STAFF ENGINEER

Apr 2025 – Present

- Led end-to-end delivery of file-over-memory project from research through platform team technology transfer
- Boosted inference performance by 80% over vLLM by optimizing file-over-memory architecture and resolving E2E bottlenecks
- Established code review and quality standards, reducing validation cycles and improving service stability

Huawei Technologies Canada Co., Ltd.

Markham, Canada

SENIOR ENGINEER

Aug 2023 – Mar 2025

- Engineered xPU data-direct accelerator: 2.9 GB/s at 73% PCIe Gen3 utilization, 25% better than Nvidia's BaM
- Reduced file-over-memory latency by 90% through protocol optimization between client library and manager
- Developed PD disaggregation feature for vLLM and session management for AI workload scheduler (AiWS)
- Mentored 6+ engineers on system design and I/O optimization

University of California, Santa Cruz

Santa Cruz, USA

GRADUATE STUDENT RESEARCHER

Jan 2016 – Jul 2023

- Developed **SmartNICs**-based distributed data-flow platform for HPC at Sandia National Laboratories
- Implemented *Bitar*, a C++ library using Apache Arrow and DPDK, accelerating data compression >8x with BlueField-2 DPU
- Published 6 peer-reviewed papers; work featured in The Next Platform and Data Centre Dynamics
- Contributed to Ceph and Apache Arrow open-source projects
- Developed *no_fscache*, a Linux kernel module addressing page cache pollution issues

KIOXIA America Inc.

San Jose, USA

STRATEGIC MARKETING ENGINEER INTERN

Jun 2020 – Sep 2020

- Quantified >10x performance speedup of SQL query offload to SSDs using MariaDB, Docker, and TPC-H benchmarks
- Collaborated on cross-team projects to identify IO performance issues in NUMA systems

Samsung Semiconductor

San Jose, USA

PERFORMANCE ANALYSIS ENGINEER INTERN

Jul 2019 – Sep 2019

- Built distributed testing framework for Samsung Network KV device performance evaluation
- Created eBPF and kprobe tools exposing performance observability; identified bottlenecks boosting write performance by 60%

Wumii Technology

Shenzhen, China

ANDROID DEVELOPMENT TEAM LEAD

Dec 2012 – Jun 2014

- Led design and code reviews for a top-25 reading recommendation app in China
- Implemented energy-efficient Paho MQTT notification module in Java; 35% latency improvement over commercial solutions

Wumii Technology

Shenzhen, China

SENIOR SOFTWARE ENGINEER

Jun 2010 – Dec 2012

- Architected first news recommendation system in China using Spring, Hibernate, and Google Closure Compiler
- Launched multi-platform recommendation platform (Java, PHP, JavaScript) serving 200M monthly active users

Education

University of California, Santa Cruz

PH.D., COMPUTER SCIENCE AND ENGINEERING

Thesis: *Composable Data Services for Embedded Systems*; GPA: 3.96/4.00

Committee: Carlos Maltzahn (Chair, UCSC), Scott A. Brandt (UCSC), Peter Alvaro (UCSC), Craig D. Ulmer (Sandia National Laboratories)

Funding: DOE Office of Science/ASCR (FWP 20-023266); DOE NNSA (DE-NA0003525).

Santa Cruz, USA

2016 – 2023

South China Agricultural University

B.S., INFORMATION AND COMPUTING SCIENCE

GPA: 3.45/4.00

Guangzhou, China

2006 – 2010

Honors & Awards

May 2023 **Best Paper Award**, 2nd Workshop on Composable Systems (COMPSYS '23)

Florida, USA

Sep 2022 **Outstanding Student Paper**, 26th Annual IEEE High Performance Extreme Computing (HPEC '22)

Virtual Conference

Oct 2009 **National Encouragement Scholarship**, South China Agricultural University

Guangzhou, China

Oct 2009 **The Second Prize Scholarship**, South China Agricultural University (top 10%)

Guangzhou, China

Oct 2008 **State Grants**, South China Agricultural University

Guangzhou, China

Oct 2008 **The Second Prize Scholarship**, South China Agricultural University (top 10%)

Guangzhou, China

Publications

Opportunistic query execution on smartnics for analyzing in-transit data

Jianshen Liu, Carlos Maltzahn, Craig Ulmer

2023 IEEE High Performance Extreme Computing Conference (HPEC), 2023

Extending Composable Data Services into SmartNICs

Craig Ulmer, Jianshen Liu, Carlos Maltzahn, Matthew L. Curry

2nd Workshop on Composable Systems (COMPSYS '23), Co-located with IPDPS 2023, 2023, Florida USA

Processing Particle Data Flows with SmartNICs

Jianshen Liu, Carlos Maltzahn, Matthew Leon Curry, Craig Ulmer

26th Annual 2022 IEEE High Performance Extreme Computing (IEEE-HPEC 2022), 2022, Virtual Conference

Performance Characteristics of the BlueField-2 SmartNIC

Jianshen Liu, Carlos Maltzahn, Craig Ulmer, Matthew Leon Curry

Sandia National Lab. (SNL-CA), Livermore, CA (United States); Sandia National Lab. (SNL-NM), Albuquerque, NM (United States) (May 2021). 2021

Scale-out Edge Storage Systems with Embedded Storage Nodes to Get Better Availability and Cost-Efficiency At the Same Time

Jianshen Liu, Matthew Leon Curry, Carlos Maltzahn, Philip Kufeldt

3rd USENIX Workshop on Hot Topics in Edge Computing (HotEdge'20), 2020, Virtual Conference

MBWU: Benefit Quantification for Data Access Function Offloading

Jianshen Liu, Philip Kufeldt, Carlos Maltzahn

International Conference on High Performance Computing (HPC-IODC 2019), 2019, Springer, Cham

Presentations & Posters

Experience of using the BlueField-2 DPU

Presented at Sandia National Laboratories (May 2022). 2022

Processing Particle Data Flows with SmartNICs

Presented at UC Santa Cruz Open Source Symposium (Sept. 2022). 2022

Eusocial Storage Devices

Presented at KIOXIA America Inc., Seagate Technology, and Fujitsu America Inc. (2020). 2020

MBWU (MibeeWu): Quantifying benefits of offloading data management to storage devices

Poster Session at 17th USENIX Conference on File and Storage Technologies (FAST'19) (Feb. 2019). 2019

Quantifying benefits of offloading data management to storage devices

Poster Session at 2019 OCP Global Summit Symposium (Mar. 2019). 2019
